13:50 – 14:50	Monitoring planning workshop
14:50 – 15:00	Next steps – plans for future community of practice events
15:00	Finish

The monitoring workshop is designed to help those involved in NFM projects to:

- Discuss the monitoring objectives outlined in the Environment Agency guidance, further outlining the methods and rationale of the techniques
- Hear from other projects, at varying stages of implementation regarding successes, failures and best practice in implementation of the monitoring objectives
- Understand how the data being collected will be used to provide evidence of the effectiveness of NFM measures
- Plan out what the best monitoring approach might be at each site, and ask site- specific and more general questions regarding monitoring
- Participate in a hands on practical relating to soil health
- Contribute to the content and direction of further Community of Practice workshop events
