[Findings](#)

Work Package 1

A place-based analysis of population-level linkages between natural environments, health inequality, deprivation and green space usage

Work Package 2

Cultures and values of nature and health & wellbeing: reflecting a diverse society

Work Package 3

Which characteristics of urban natural environments deliver the health & wellbeing benefits?

Work Package 4

A new green paradigm for wellbeing - an integrated approach to Green Blue Infrastructure planning, health and social care

What projects are you currently working on or are aware of where health and the environment come together?

**What are the main issues you face
when trying to link health and the
environment?**

**How could an iCASP project help
address issues linked to Health
and the Environment?**
